SUMMARY

Aspiring DataScientist and AI engineer with hands-on experience in developing AI-driven applications and data-focused solutions. Skilled in building practical softwareproducts across data science, web development, AI integration, and modern deployment workflows. Passionate about transforming ideasinto meaningful, real-world technology solutions.

SKILLS

Languages: Python,Java,C,C++,JavaScript
Frameworks: React.js,Next.js,Flutter,FastAPI, Flask
Tools & Deployment: Supabase, Firebase, Vercel, Render, Git & GitHub, BI tools
AI skills: Context Engineering & Vibe Coding, Agentic AI, API Integrations
Soft skills: Communication,Leadership,Time Management, Problem Solving, Teamwork

EDUCATION AND TRAINING

School: DonBosco Hr.Sec.School,Madurai
College: B.Tech InformationTechnology, Sethu Institute of Technology, Kariapatti

LANGUAGES

Tamil - Fluent | English-B1Intermediate

AWARDS & HONORS

- Best student of theacademic year 2024-2025
- First place in InnoGen Hackathon conducted by Tarcin Robotics, Madurai
- Top 20 Finalist – National Startup Summit 2026 received a Certificate of Recognition for outstanding achievement.
- First place in Synchrocode competition in Hexavita'25 at Sethu Institute of Technology (National Level Symposium)
- Second place in Codesprint Pro coding event in Mangayarkarasi College
- Won a best project award in the Science Expo at Sethu Institute of Technology

CERTIFICATIONS

- C, Java and Python Programming
- Project Based Robotic Training (IoT Level)
- EF SET English 4 Skills Test - C1 Advanced level, score 62/100
- Responsible and Safe AI Systems - NPTEL

WORK & EXPERIENCE

- **Data Science & Web Development Intern** | **Tarcin Robotics, Madurai**
  Currently contributing to real-world software projects and AI-driven products, with hands-on involvement in data science workflows, web application development, AI integrations, and product implementation.

- **10-Day Intern** | **Aavin Milk Producers' Cooperative Union, Madurai**
  Completed a 10-day internship involving milk quality testing and analysis, milk collection process exposure, and software development work for an internal project.

MINI PROJECTS

- **GENQUIZ:** Developed a full-stack AI-powered multiplayer quiz and gaming platform using React, FastAPI, Supabase, and WebSocket integration. Built features including AI quiz generation, real-time multiplayer rooms, manual quiz creation, voice interaction, and interactive mini-games with responsive UI/UX and smooth animations.

- **Fixtoflex:** AI-powered job application platform that analyzes resumes, profiles, and job descriptions to generate ATS scores, job-match insights, career recommendations, and skill-gap analysis. Includes AI-based recruiter candidate ranking and automated email workflows. Built with React, Next.js, FastAPI, Supabase, Gemini API, Google OAuth, and Gmail API.

- **Translynk (Top 20 Finalist – National Startup Summit 2026) :** Developed an AI-powered multimodal communication platform for real-time Indian Sign Language and multilingual voice translation using React, Ionic, FastAPI, PyTorch, OpenCV, MediaPipe, Bhashini, Sarvam AI, WebRTC, WebSockets, Redis, and PostgreSQL.
